

Job Description – Service/O&M Technician

Established in 2006, LightWave Solar is the trusted source for solar PV and energy storage installations in the Southeast.

We are looking for a Service/O&M Technician to work with existing photovoltaic (PV) systems installed by LightWave Solar and others. Technician will be called on to perform Service, Warranty and Operation & Maintenance duties. Systems range from 1kW to multiple MW, and project types vary and include residential, commercial, industrial and utility-scale grid-tied, off-grid and hybrid/battery storage systems. Project locations span a large part of the TN Valley region and include ground-mounted, roof-mounted and carport installations as well as fixed-tilt and tracking systems. Position includes troubleshooting and maintenance of monitoring systems as well as analysis of data obtained from monitoring systems.

PRIMARY RESPONSIBILITIES:

- Respond to Service calls as dispatched, drive assigned issues and seek advice/counsel as needed
- Track progress of cases and log communications with clients and manufacturers as detailed notes in Sugar CRM
- Perform troubleshooting and implement Code compliant fixes in the field in a safe manner
- Work with OEMs to determine warranty status of installed equipment
- Fill out Service Work Orders, track travel and labor time as well as used materials for billing
- Communicate all matters with Service Manager
- Confirm accuracy of, red-line and/or modify As Built Drawings as needed
 - Bring changes to Service Manager's attention for inclusion in archived documents
- Secure additional field help for Service work, as needed, through Service Manager
- Work on PV Installation team(s) as necessary and when available
- Perform PV system commissioning and testing processes
- Assist Service Manager in feedback loops to Install, Project Management and Engineering teams
 - Critically examine installations and pass on findings through constructive feedback to constantly improve quality

KNOWLEDGE AND SKILL REQUIREMENTS:

- 1+ year minimum experience as a solar PV Installer preferred
- Full NABCEP PV certification preferred
 - Additional Electrical licensure or formal technical education a plus
- Strong understanding of grid-tied, off-grid and hybrid PV system design and installation, commissioning procedures, shut down / LOTO procedures, programming, troubleshooting, monitoring and repair
- Knowledge of the NEC Code and the ability to use and reference the Code as required
