## **Sustainability Internship Program Description**

Established in 2006, LightWave Solar is the trusted source for solar PV and energy storage installations in the Southeast. Our mission for the LWS Sustainability Intern is to offer high-quality professional development and renewable energy industry experience to a motivated individual in exchange for their work to progress LightWave Solar's sustainability goals.

This Sustainability Intern will work to operationalize sustainability through collecting & analyzing data, developing creative programming and initiatives, conducting peer-to-peer outreach, and conducting research.

This internship will initially focus on establishing a basic understanding of LightWave Solar's emissions and waste and in what quantity we consume them, so we can create strategies for reductions and improvements.

The Sustainability Intern will have various opportunities to experience the inner workings of a leading Solar company, including, but not limited to project site visits, project administration, warehouse management, and sustainable event organization.

Knowledge and skills required:

- Valid driver's license
- Experience working in Excel and other Microsoft programs
- Great with data tracking and crunching numbers
- A passion of sustainability and renewable energy
- A passion for composting, recycling, and community involvement

Incentives:

- Solar 101 Training
- OSHA 10-hour certification
- Work materials provided as needed such as: laptop, office supplies, etc.

This is a \$15 per hour internship. Start date & duration of internship depends on availability and experience. The location will be primarily in our office in Antioch, TN.

To apply please send your resume and (optional) cover letter to [adisalvo@lightwavesolar.com](mailto:adisalvo@lightwavesolar.com) with the email titled "Sustainability Intern Application."
